(PERMIT TERMS CONTINUED)

The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights. This temporary permit is issued under the provisions of NRS 534.120(2) as a preferred use.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The water obtained as a result of this dewatering operation shall be used first by the permittee for mining and milling purposes. It is noted that previous permits issued included a combined total annual allowance of 2238 million gallons annually for mining and milling purposes. The total combined consumptive duty of water under the permits in the name of Barrick Goldstrike Mines, Inc. or any successors and permits 55139 through 55150, inclusive, shall not exceed 2238 million gallons annually for Barrick's mining and milling purposes.

Any water not used for mining and milling purposes may be utilized: to address water right impairment, if any, resulting from the diversion of water pursuant to the Barrick Applications; to satisfy water use and water management requirements, if any, resulting from actions taken by other governmental agencies; to reinject or infiltrate water; to replace existing authorized ground water withdrawals; and to serve other beneficial uses that would not adversely impact other water rights. The authorized uses under this permit are subject to the terms and provisions of that "Stipulation, Settlement Agreement and Withdrawal of Protest" between Barrick or its successors and Eureka County filed in the State Engineer's Office on February 8, 1991.

This water may be diverted to storage and/or discharge through the reservoir constructed under Dam Application J-320. Rights to place such water to use for consumptive or non-consumptive purposes shall be provided under Primary Permit 55272 and any secondary permits issued thereunder.

A monthly report shall be submitted to the State Engineer within 10 days from the end of each month which shall include the amount pumped from each well, the amount used for mining and milling purposes and the amount of water diverted to storage in the reservoir.

The total combined diversion rate under Permits 55139 through 55150, inclusive, 56920-T, 57080-T and 57081-T shall not exceed 100 c.f.s. The total combined withdrawal of water under Permits 55139 through 55150, inclusive, shall not exceed 72,000 acre-feet annually.

This temporary permit also incorporates the provisions of "Order on Rulemaking Concerning Spacing Requirements in the Northern Portion of the Boulder Flat Groundwater Basin" entered March 29, 1991, number 1038.

This temporary permit is subject to the "Boulder Valley Monitoring Plan" previously approved by the State Engineer on April 10, 1991.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on March 2, 1993 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
